

# GRAYSTONE CATTLE COMPANY

**PRODUCTION SALE**

**MARCH 21, 2021 2:00PM**

**AT THE RANCH STOCKPORT, IOWA**

***Welcome to the 2021 Graystone Cattle Company spring production sale. It seems that every year has its own challenges. Last year, we were not allowed to have a public sale due to the country being locked down due to a virus. This year the challenges have come in a little different form. In February, we dealt with temperatures below zero for an extended period of time with several layers of snow and ice to deal with as well. At the end of February, the spring thaw came and we went from -21 to the mid 40s in about a week. Granted, we were sure glad to see it warm up but as with any Iowa spring thaw it also brought the mud. As always, we have survived everything mother nature has thrown at us and green grass is getting closer every day.***

***While our numbers in this sale are not big, we think the genetics offered are huge. The 2 year old bulls are a big, powerful group that we are quite proud of. The yearling bulls are coming along nicely even though we don't push our yearlings very hard. We put a lot of emphasis on cow families in our program and you will likely notice that many of the lots being offered are similar genetically especially on the maternal side of the pedigree. The cows are the real power behind our breeding program.***

***This year in addition to the two year olds we traditionally offer, we will offer some yearling bulls as well. We have had some requests for yearling for guys to use on heifers the first year.***

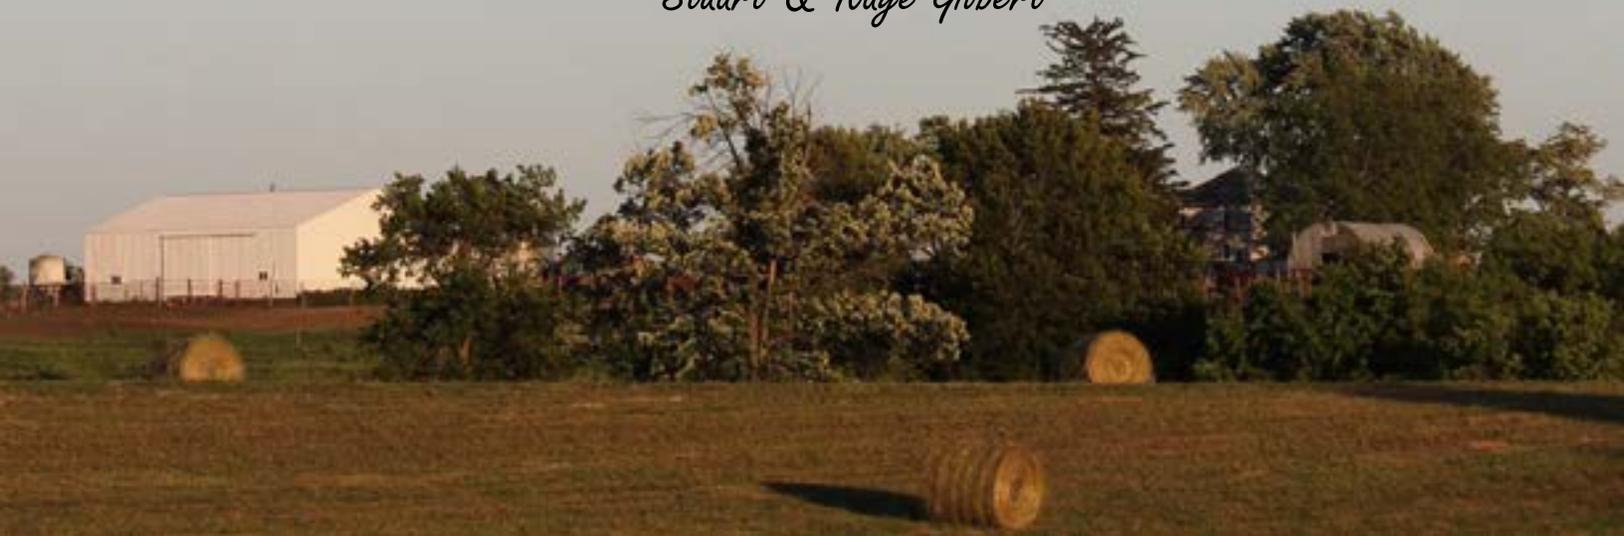

***Once again, this year we are offering to keep the bulls until May 15th for our the convenience of our buyers. We also will deliver them to you at no charge up to 300 miles.***

***The sale will be broadcast on DV Auction if you cannot attend in person. If you need to leave a bid on an animal or be on the phone, don't hesitate to give me or one of the sale staff a call.***

***Kaye and I hope to see you Sunday afternoon, March 21st***

Sincerely,

*Stuart & Kaye Gilbert*

## HOTELS

HERD BULL!!! What do you get when you combine arguably the most influential sire we have ever had, Conquest 495, with the now deceased Canadian donor cow Red Riverdale Princess 120T? A legitimate herd bull! We used him as a two year old on some of our best cows and heifers. I can tell you that if we weren't so heavily influenced by his sire, he wouldn't be for sale. We believe that the females produced by this bull will be rockstars. He ranks in the top 9% of the breed for the HB index, top 25% for WW, 20% ME, 14% STAY and 24% YG. His 74 pound BW leads me to believe that the calves will come easy and we may have some on the ground by sale day. Our son, Wyatt, calls him Clyde. I call him good!

**BJR COPPERLASS 2111**

If you need to put pounds into a calf crop, take a serious look at this fella. He is the literal definition of beef! Lots of growth and carcass traits and his numbers reflect that by ranking him in the top 2% of the breed for WW, 2% YW, 4% ADG, 3% CW and 13% REA. This is a mating that just plain work! We are retaining a full brother to him this year for use in our herd. The combination of 495 and the Makin Hay X Copperlass cow is as close to a sure thing as there is in the cattle business. We will have his little brother "Dirty Harry" here on display as well on sale day.

This 495 son has gotten a lot of looks from all who have been here this fall and winter. His dam is a 9 year old Cutting Edge daughter that is as consistent in production as you can make one. We are really liking our Cutting Edge females and believe they will be a large part of our breeding program going forward. This 2 year old was born at just 78 pounds and still has growth to burn. He ranks in the top 6% of the breed for the HB index, 14% WW, 24% YW, 11% STAY and 11% CW. Don't be afraid to retain the daughters of this guy either!

We used this bull as a yearling to clean up a group of heifers after AI. His sire was a feature lot in our 2019 sale and certainly left us some really nice daughters who are now coming into production this year. One of the most maternally oriented bulls in the sale, I expect the daughters of this bull to be as good or better than his sires. His dam is an 11 year old cow who has more than pulled her weight around here. She has another son in this offering in the yearling division that was in our pen of 3 bulls at the National Red Angus show in OKC this past January. A lot of cow power offered here!

## GCC SEQUOIA 1916

I like this bull a lot! He is a 495 son that looks like a herd bull should look. Big topped, long spined and square hipped without sacrificing a sweet front end. His 9 year old dam always puts one in the top end and we have retained most of her daughters. Her sire was a bull that we bought out of Canada that was lost early in the first breeding season so we don't have a lot of his genetics to work with but the ones we do have are phenomenal. He has a full brother that sells in the yearling division who was also in our pen of 3 bulls at the National Red Angus show in OKC. Predictable genetics that work.

GRAYSTONE MILK MAID

This is the only Road Warrior son we have to offer. Road Warrior was Reserve Grand Champion bull at the Iowa State fair as a two year old and many other titles as a yearling and calf before that. Unfortunately, we lost him after using him as a cleanup bull his first breeding season. This bull has all of his length of body and dimension. His pedigree is unique in the fact that he has a double shot of the Milk Maid cow family in him. Those who follow our program are well aware of the impact that the Milk Maid cow family has had and continues to have here at Graystone Cattle Co. 1927 ranks in the top 16% of the breed for the ProS index, 5% HB index, 27% WW, 26% YW, 26% ADG, 18% MILK and 6% Stay.

*Lot*  
**1931**

### GCC WALKING TALL 1931

This bull is a result of one of my favorite matings, 495 bred to a Walkerton 10W sired cow. Walkerton was a bull we bought in Canada who left us a super set of females. We liked them so much so that we dug into our tank 9 years later and pulled out a few canes of him to use last year in AI season. 1931 is a really good combination bull that covers many of the critical tasks that we look for in a bull. He ranks in the top 22% for the ProS index, 8% HB index, 6% WW, 11% YW, 26% ADG, 14% STAY, 17% CW and 18% REA. His dam is a daughter of the Duchess 9009 cow that we purchased from the Pieper herd in Nebraska several years ago.

DFRA LANA 113

1915 is a muscle machine. He is sired by 495 and his dam is a Mulberry 26P daughter that was our pick of the bred heifers in a past DAMAR Farms production sale. She hits one out of the park nearly every time and we have several full sisters at work in our herd to 1915 including a heifer that Wyatt will show this summer who was also in our pen of 3 heifers at the National Red Angus show in OKC. Truthfully, his dam should be in an ET program. 1915 numbers up pretty good too as he ranks in the top 23% for the ProS index, 7% HB, 10% WW, 13% YW, 21% ADG, 18% HPG, 9% STAY, 16% CW and 16% REA. Growth, fertility, longevity and carcass all rolled into one neat package.

**1902**

## GCC WARRIOR 1902

1902 is possibly one of the longest spined bulls to sell this year. Longer than a well rope, this Night Ranger sired bull has growth and power to burn! His dam is a Razor Edge daughter that goes back to the Duchess 9009 cow. If you need to put some "jet fuel" in your next calf crop, this guy will get it done in one generation. He has a little more frame than some of the bulls but I think we may need to add a little frame back into our cattle to stay competitive in the animal protein business. He ranks in the top 33% for the ProS index, 30% HB index, 11% WW, 18% YW, 3% MILK, 11% CW and 16% REA. Many of my favorite cow families are stacked in his pedigree.

Wide Open was in our pen of 3 bulls in the National Red Angus Show in OKC, where they won their class of April bulls. I really like the way that this bull is put together from one end to the other. He just has that herd bull look to him. His dam was 10 years old when he was born and has been an excellent producer over the course of her career here. She will calve again this spring as she should at 11 years old. While his sire, 495, has been a mainstay here for the last few years, it's the cow families that carry the load for us here. Wide Open ranks in the top 6% for WW, 11% YW, 24% ADG and 16% CW.

PSSS GCC TINSEL 1250

Rock Solid is a calving ease bull with a 70 pound birth weight and a -1.5 BW EPD. He is sired by the Canadian bull Red Brylor Big Rock, a Mulberry son that topped Brylors sale going to the DAMAR program in WI before health reasons caused their historic dispersal. 2001's dam is a nice young 495 daughter who's dam is a Brylor/RAZ Makin Waves daughter from the tinsel cow family. Quite a bit of Canadian genetics offered in Rock Solids pedigree.

RCRA LACEY 3Z

GCC INTIMIDATOR 1603  
GCC RCRA FIREBERRY 1833 (4045660)  
RCRA FIREBERRY 7Y

Dr Pol is the first son of the Dr Know bull that we purchased from Rock Creek in Montana. Unfortunately, he decided to hang by his flanks in a fence over night and ruined his "business" parts so progeny will be very limited. His dam is an Intimidator daughter who was a first calf heifer. Intimidator is a full brother to the 1931 bull who sells in the 2 year old section. Intimidator is a walking herd sire for the Mustang Ranch in Texas. With a 71 pound birth weight I think that Dr Pol would be a logical choice for heifers as well.

Wide turn is a Dr Know son out of a Wide Turn daughter going back to the famed Strawberry cow family. Wide is a pretty accurate description as you study this bull from behind and from the side. Moderate in his kind and make up, he is naturally thick from one end to the other. He got a little banged up as a calf last fall and we had to treat him for several days. As such he is not quite as quiet as some of the other bulls when you get him by himself. The boys out west won't think much about it but we want to be up front about everything.

Revelation is a Face Off son who's numbers probably don't do him justice. His dam is a rare Graystar daughter and he was at one time the highest WW and YW EPD bull in the breed. The Face Off calves are just a little bit later maturing cattle and he is just now starting to hit his stride and continues to get better and better every day. He will turn a year old on sale day and I have no doubt that his best days are in the very near future as he matures.

**Copperas Creek Wide Load  
Sire to Lot**

Wide Load 500 comes from a star studded pedigree with Wideload 920W and Cheyenne B221L in the first generation back. With a 71 pound birth weight, I would believe that he would be a bull you could use on heifers as well. He will be 15 months old by sale day

## Package C

20 UNITS OF GCC DIRTY HARRY 2029  
 Upon availability

GCC Dirty Harry 2029 is a young bull that we are very excited about. He was the lead off bull in our Pen of 3 bulls in the National Red Angus Pen Show in OKC. We believe he is the power bull that the breed is looking for. He is a 495 son out of a 6 year old Makin Hay cow that will likely be a donor female for us. He came in at weaning time off of nothing but grass, sunshine and momma's milk at 770 pounds. He blows the growth numbers out of the water ranking in the top 1% WW, 1% YW, 2% ADG and 10% REA. Being a May born calf we have not collected him yet but will sometime in April. The buyer will pay for this lot upon a successful collection. Here is a chance to get into our leading edge genetics.

Dutchess of York is a Face Off daughter that I really like. Power, power and more power and yet still pretty! Her dam is a 10 year old daughter of past National Champion Bull, NBAR Negotiator and the Duchess 9009 cow who started the Duchess cow family for us. Two of the most important numbers to us in the females are the HB index and the STAY EPD. 2016 ranks in the top 8% for Herd Builder index and 4% for STAY EPD. I think this young female has a tremendous amount of potential.

Betty Boop was in our pen of 3 heifers in the National Red Angus pen show in OKC in January. She was the first Face Off daughter that we "put out in the public" and had many fans in OKC. Her dam goes back to one of our very first foundation cows that also raised our high selling bull Nitro at the Cattlemens Classic sale in Nebraska a few years ago. She ranks in the top 25% HB, 15% ME and 11% STAY. She has been an easy find in the pasture all summer long.

RRA CONQUEST 124 495  
GCC MS LAKOTA 1622 (3528498)  
GCC MILKMAID 1102

This is probably a mistake to offer Milk Maid 2035 for sale. First, she is one of my favorite Face Off daughters, 2nd, her dam is a full sister to the Blue Blood bull who sells in the yearling bull section, 3rd, she is from the Milk Maid cow family and I just hate to let any of them go and 4th, she has the sweetest disposition I've ever seen in a heifer calf. She ranks in the top 23% ProS, 7% HB and 4% STAY. I'm pretty sure that I'm going to regret doing this.

## SALE TERMS & CONDITIONS

**TERMS:** Terms of the sale are cash, check or other terms agreed to in writing between seller, buyer and sale manager payable immediately upon conclusion of the sale before animals will be moved. Sale manager reserves the right to require certified check a settlement before releasing any cattle.

**PURCHASER'S RISK:** All animals are the owner's risk prior to their sale and become property of the purchaser as soon as declared sold by the auctioneer.

**BIDDING:** Any disputes or challenges regarding bids or tie bids will be settled by the auctioneer and his decision will be final.

**CERTIFICATE OF REGISTRY:** A certificate of registry for each animal will be transferred to the buyer at the seller's expense.

**ANNOUNCEMENTS:** Any errors or changes in information contained in the catalog will be announced from the block. Such announcements shall take precedence over the information contained herein.

**HEALTH:** All animals are eligible for interstate shipment. Interstate health papers prepared by an accredited veterinarian will be furnished on each animal sold. Arrangements for international shipment should be made with the sale manager prior to the auction. All efforts for the exportation for cattle can be arranged through the sale manager.

**BREEDING GUARANTEE:** All animals are guaranteed by the seller as outlined in the Red Angus Association of America Breeders Guide Sale Terms and Conditions.

**LIABILITIES:** All persons who attend the sale do so at their own risk. The seller, auction facility and sale manager assumes no liability for any accidents that may occur. Neither does the seller, auction facility or sales manager assume liability for the loss or injury to livestock due to theft, mysterious disappearance, sickness, improper handling or Act of God. It is to be clearly understood that the sale manager and its representatives act only as a medium between the buyer and seller. They are not responsible for in any way the failure on the part of the buyer or seller to live up to their obligations or for the part of the buyer or seller to live up to their obligations or for the truth of any warranties or representation, expressed or implied. Neither does the sale manager assume any financial obligations to collect or enforce collection of monies between parties. Any legal action that may in exceptional cases to be taken must be between the buyer and the seller. This catalog has pedigrees and information supplied by sources deemed reliable, however, the sale manager will in no way guarantee the pedigree, percentages of the animals selling, or data included in this catalog. Any expectations taken are between the buyer and seller.

**CONTRACT:** The above terms and conditions of sale shall constitute a contract between the buyer and seller or each animal and shall be equally binding upon both. Each sale or resale of an animal constitutes a separate transaction.

**MAIL BIDS:** Mail bids will be accepted.

**TELEPHONE BIDS:** Telephone bids will be taken by the sale manager or committee members. The sale day numbers are listed on the consigner page of this catalog.

**This sale will be broadcast live on the internet.**
